This software is a scam, there is no way that real software would 100% crash,and/or corrupt every single file you import into it within 10 minutes of using it. Don't get me wrong,it would be an amazing tool for retopo if you could use it for more than 5 minutes after which it glitches out. Camera stops working,your cursor will be drawn wherever you go with it (what is this,Windows xp?). And if you dare to save it white it happens, after you've done a lot of topology work that you don't want to go to waste, the file will be corrupted and you can start all over again.Sometimes it crashes too. I've had this software for years and it's always been like this, the dev still hasn't fixed it (hence the low "playtime",I just bought other software that actually works). So yeah,save your money and buy something else instead..
