This review isn't about the game itself but about how greedy Arc System Works is.
The game is good, that's not the problem.
The problem is their worthless greed.

You see, the game is already overpriced as it is especially for a 2015 game.
They released a newer version where you have to pay overprice again.
And guess what, it only adds two new things in the game, that's all, up-coming content will be paid DLCs.
Let's not forget that both games are overpriced, and that you gotta pay for an "update" that should have been free, and don't start with that "but they gotta work" crap, if they're too greedy or incompetent that's their problem, lot of games back in the days were complete and some games came with free updates that were better than the SIXSTARS "upgrade".
Shall we not forget that they got the money from people on Kickstarter?
So not only their games are overpriced for what they are, not only they've earned lot of money via Kickstarter, not only the games were already made (SIXSTARS was an already existing arcade game) but they dare to make you pay for an update and some dlc characters that takes forever to see the day.

So that is why i cannot encourage this, to anyone with a bit of intelligence would see how greedy and cancer this is.
Don't buy both, buy only SIXSTARS and wait for heavy sale (3\$ at the highest or 6\$ complete edition if it the dlcs ever comes out and depending on how many they do.

7.8/10 - the game itself, not the greatest fighting game ever but very good nonetheless.

-1/10 - Arc System Works\EXAMU Inc., that's just plain thieving right there, pure greed that shouldn't be allowed, if they keep it up like that, better just go bankrupt already and let someone better take care of their titles.

Now that you know the facts, it's up to you to decide, just don't buy both, buy the newer release (SIXSTARS) when it'll be on sale and forget about this release.
