TL-WR340G/TL-WR340GD is the wireless router of TP-LINK. TL-WR340G/TL-WR340GD routers are the first of its kind to be released on the market. TL-WR340G/TL-WR340GD routers are a multi-band router with a 4-port switch built in. TL-WR340G/TL-WR340GD routers come with the 3 best class-leading Wi-Fi protocols running concurrently at the same time. This unique feature helps to achieve the class-leading performance and a high level of security. Overview Besides the common

WiFi protocols such as 802.11 a/b/g/n and 802.11ac, the TL-WR340G/TL-WR340GD router is also capable of running the latest dual band protocol 802.11ac and Bluetooth. With this feature, users can stay online and take advantage of 802.11ac High Speed 4x4 MIMO technology. Furthermore, users can also enjoy watching videos and playing games online on their cell phones or tablets. The router supports DIGI+ Sound system technology which is a highly built-in amplifier technology to provide optimal sound quality and protection. The next advantage is the Real Power Boost system which can turbo-boost the available power output up to 200mW. This feature maximizes the available bandwidth for high speed data transfer. Furthermore, the internal power supply system of the router ensures an efficient and reliable power supply. The TL-WR340G/TL-WR340GD router provides multiple management and control buttons on the front panel. In order to make the different control functions easier to operate, the user can quickly access and control the router from the management interface of the cell phone or tablet.

On the top of the router, users can find a 2.4GHz antenna and a 4.0GHz external antenna with wide coverage area. On the bottom of the router, there is a USB port which provides support for downloading firmware and updating firmware. The TL-WR340G/TL-WR340GD router is an all-in-one device that includes a high-performance 4x4 MIMO technology antenna, a real Power Boost system, an internal antenna and the software. Therefore, users can enjoy the best wireless coverage and the best power output and reception performance all at the same time. In order to support the different power and stability requirements of the home network, the router can be connected to the f678ea9f9e
