I played this game as a kid with my dad. It's an old one for sure. It's fun, though! It doesn't have a ton of replay value, but the first time through the game, there are puzzles to solve and achievements to get! It's cute and simple, but can be played with any computer, and it's long-lasting!. To be fully honest, I'm not sure how they got "Mortal Fate" from Higyaku (う88ab\u8650). "Noel the Suffering" would have been a better translation.

On that point, the title's translation shares a lot in common with the game - it could really use a better translation than what has been released.

However, if you're willing to put up with some poor grammar this series actually has quite a cool plot. Just make sure to grab it on a sale. I wouldn't put up with the translation quality for \$15. \$9, maybe.. An hilarious and surprisingly entertaining game, never dull and without an inch of boredom in its various levels.

Strongly recommended if you like beer, metal and having fun!. Great game, lots of fun. Even Rookie series is great fun.

BUT...it would be much more fun if AI would make mistakes too, I'm the only one crashing in races. UPDATE: there is now change that AI fall off bike in race, but will jump back to bike and finish the race.. I DON'T WANT TO USE THE EPIC STORE FOR BORDERLANDS RELEASES.. i easily put over 200 hours into the xbox 360 version so this is really nostalgic. Best anime shmup about pudding on Steam.

Bad optimised, didn't play even the tutorial.. The only DLC for Pac-Man Museum comes with a high price tag (\$5.49 CDN) and little to offer.

This DLC should of been part of the original package.

This DLC does NOT add any achievements or stickers, just a global Leaderboard for the game.

One of the main issues I have with this DLC is the extra loud and super annoying "woo woo woo woo" sound that constantly plays. This sound effect is so bad and loud that it makes me not want to play!

It's far worse than the regular Pac-Man on the game, and it just might be worse than the original arcade version.

Wait for a sale.. Linden Labs can suck an egg!. Surprised at the Salt I see this game get here and there, people drop about 3 bucks on a game and expect a triple a title or somesuch >> It's a good game for the 3 bucks you'll pay for it. Good time killer with plenty of unlockables and simple but solid gameplay. Also gains bonus points for cute kitten protag, and MAJOR props for having a Swat Cats costume. Buy it up and chill guys.. This game looks great and I want to play but.... When I go to purchase a car it says it's locked? I clicked on the 86 which is first in list and it wouldn't let me buy it what's up with that? This game looks great and the fact that it's been worked on for such a long time by so few people proves your dedication so props to you for that. I'm really disappointed that I can't even buy a car. I know it's in early access and all but I'm upset because I seem to be the only person who has had this issue. I would really appreciate an update on this by the devs or if anyone knows if I'm doing something wrong? Do I have to verify my account? Another question - the achievement page mentions a 280zx but you can't get one so far as I have seen does it unlock over the course of the career or is it not added yet?. it's the kind of obscure game that makes you keep going just to see what it has to offer. Portal meets super meat boy, tricky and awesome!
